

RiskWatch for Consulting Firms

RiskWatch works with consulting firms to ensure a successful implementation of the services they offer.

Reduce time to complete assessments by 70-80%.

Access crime and incident data to locate high-risk locations.

Measure compliance to standards and other defined requirements.

Global Incident Map

Whether a consulting firm is aiming to get organized, establish credibility, estimate costs, increase efficiency, provide a customizable solution or stand out in the crowd, RiskWatch has solutions that can help.

RiskWatch offers free trials and a service to assist in performing a proof of concept using any of its assessment platforms.

Free Trial

Through the proof of concept, consulting firms can see how the platforms:

- ✓ Require no training to use.
- ✓ Give the ability to manage a mitigation action plan and associate costs to every recommendation.
- ✓ Can be used to measure compliance to standards and other defined requirements.
- ✓ Can be used anywhere, including offline sites using the iPad app.
- ✓ Provide a risk register for cataloging and rating each client's unique threat environment.
- ✓ Include out-of-the-box survey content.
- ✓ Provide a centralized location to store clients' documents and clients can upload their own documents to be reviewed by consultants.

Realized Time Savings:

Model Inputs	Current Program	SecureWatch
Hours needed to communicate (email) and interview client, perform survey or request documents to review	1	0
Hours required to gather assessment data*	3	1
Hours required to analyze data gathered	4	2
Hours required to perform remediation	3	1
Hours required to write report	20	4
Total Hours	31	8
Total Reduction of Time	74% (23 hours per assessment)	

Use Case

RiskWatch has used its solutions with large consulting firms to:

- Increase the level of service that can be provided.
- Reduce their costs.
- Provide additional resources.
- Allow a centralized location to store and upload clients' documents.

The Processes

Additional Features

Furthermore, RiskWatch software:

- RiskWatch software Includes automation features such as: remote information gathering (eliminating the need for face-to-face interviews), generation of reports that can be customized to fit your clients' needs, calculations, risk determination using pre-established data and mitigation management.
- RiskWatch platforms will provide the consultant with knowledge from a content library and a proven process based on international standards, making it easy to establish credibility.
- RiskWatch solutions can easily reconcile data with single-button access, detailed reporting, and the ability to upload and archive auditable evidence.
