

# SecureWatch for Security Audits

Industries all across the board have to perform security audits—from banks, to healthcare, energy and utilities, and government, no one is exempt from this one. Almost no one looks forward to being audited, especially in the security division due to the growing amount of regulations—being created and enforced in attempt to prevent security breaches—that can be seemingly impossible to keep up with. Why? Because audits are known to cause stress and panic, but the fact of the matter is audits are inevitable, so it is essential that one is prepared. Questions you may ask yourself are:

- Are we compliant with the right standards and regulations and complying correctly?
- Are we missing any pieces to the puzzle?
- Do we have proof of our compliance to provide the auditor?

What most don't realize is that a security audit doesn't have to be overwhelming. In fact, it can be a total breeze. By utilizing a fully functional and automated risk and compliance assessment platform like ours, you and your team will be more than prepared for your next security audit and will have eliminated 70-80% of time and stress that it would take you to prepare manually. Here are ways that our solution can not only answer your questions, but resolve them:

- Our software contains out-of-the-box survey content for over 30 regulations and standards.
- The solution allows you to incorporate surveys in which questions are asked and answered by an assigned administrator, as well as build reports.
- The platform provides a centralized storage of documents that can be used as evidence of compliance.

# SecureWatch

A Security Audit Assessment Platform

## Key Benefits

- ✓ Eliminates errors and inconsistencies by enabling an organized workflow across the entire company while collecting and storing data to ensure a successful audit.
- ✓ Recommendations are automatically offered to mitigate gaps in compliance and vulnerabilities are identified.
- ✓ Full visibility into audit processes and metrics provided.
- ✓ Allows tasks to be delegated among staff, resulting in increased awareness and productivity.
- ✓ Reports can be generated automatically to track and provide proof of compliance.

**SecureWatch reduces the time to perform an assessment by 70-80%.**

Realized Time Savings:		RiskWatch	
Model Inputs**	Current Program	SecureWatch	
Hours needed to communicate (email) and interview client, perform survey or request documents to review	1	0	
Hours required to gather assessment data*	3	1	
Hours required to analyze data gathered	4	2	
Hours required to perform remediation	3	1	
Hours required to write report	20	4	
<b>Total Hours</b>	<b>31</b>	<b>8</b>	
<b>Total Reduction of Time</b>	<b>74% (23 hours per assessment)</b>		

\*\* The time saved can be multiplied by the amount of people that are involved in each step of the assessment process. We have only included a single person for each step in the model inputs above.

\* SecureWatch can provide data not available in current assessment program.

RiskWatch offers *free trials* and a consulting service to assist in performing a *proof of concept* using any of its assessment platforms.
